## Mid Task: Docker - Tag, Env, Volume

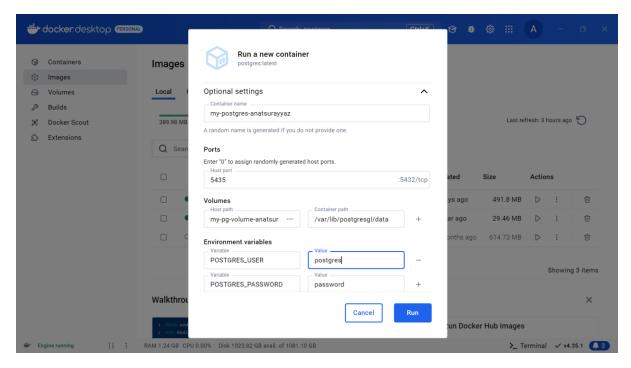

Hapus container postgres yang lama

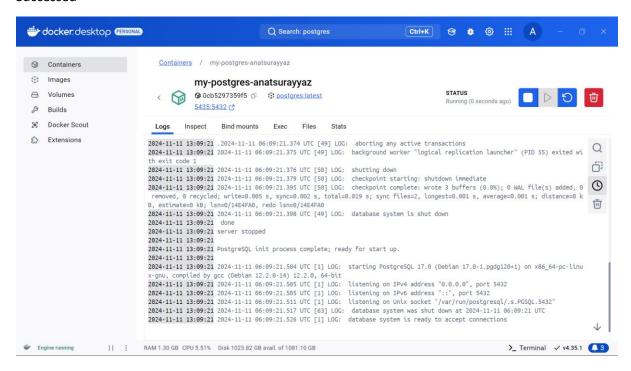

Membuat volume baru "my-pg-volume-anatsurayyaz"

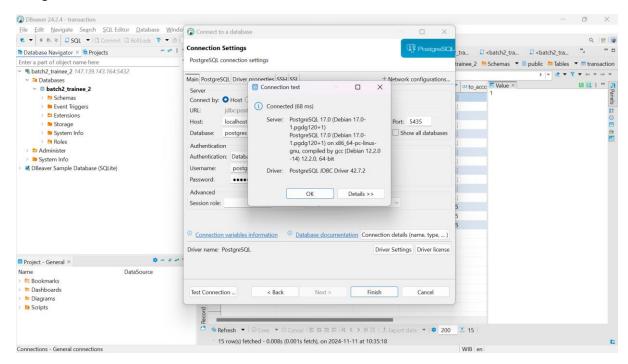

#### Created container

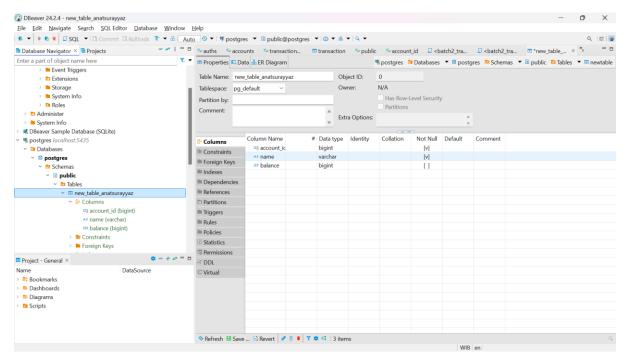

### Successed

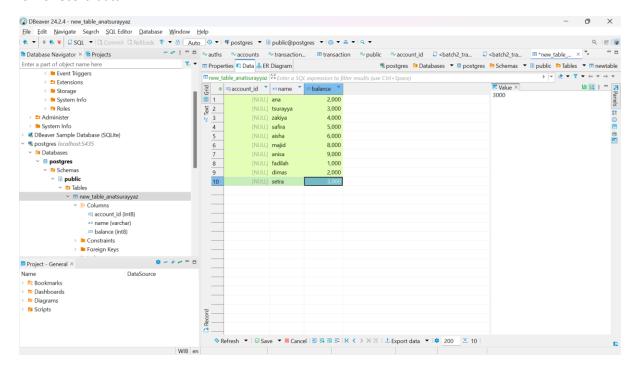

## Postgres sudah bisa diakses di dbeaver

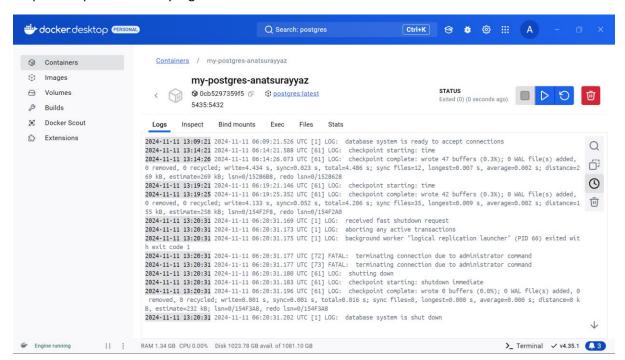

# Tambah tabel baru dengan nama "new\_tabel\_anatsurayyaz"

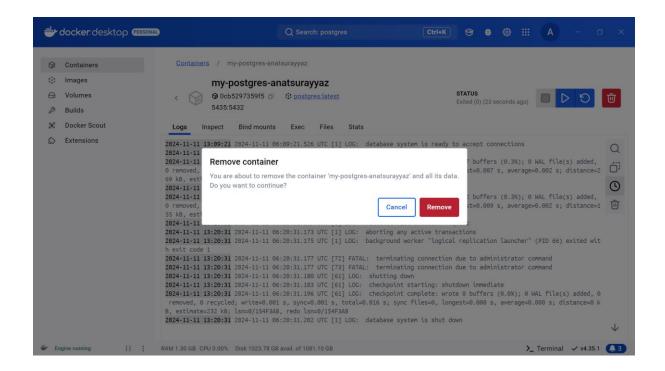

#### Isi 10 record data

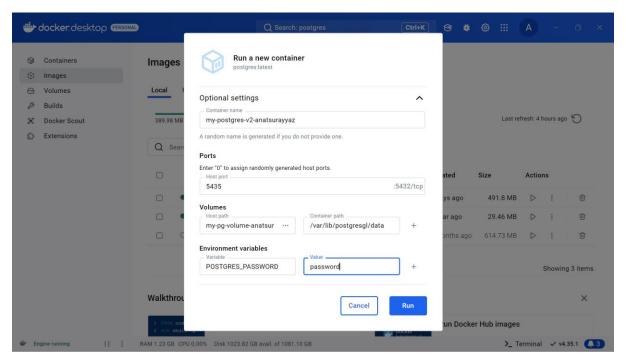

## Stop lalu hapus container yang sudah dibuat tadi

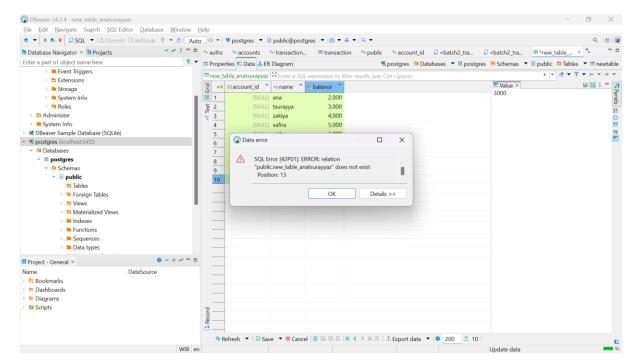

Bikin container baru dengan nama "my-postgres-v2-anatsurayyaz", lalu hubungan dengan env dan volume sebelumnya yang sudah dibuat.

Setelah container baru berhasil dibuat, cek Kembali ke database dbeaver

Tabel dan data masih ada, tetapi terdapat error dengan pesan sebagai berikut :

<sup>&</sup>quot;Error synchronizing data with database"
